iRespond Teacher's Dashboard v7.0.15 Release Notes

- Added capability to hide response labels for question responses
- Added "Show Labels" checkbox to Item Editor
- Added support for question randomization (WebApp only)
- Added ability to redirect iRespond's home directory (CWD) to a new location
 - Allows "userlist.xml" file to be read from specified location (e.g. shared network directory)
 - Allows a global iRespond preferences file to be specified to override user's current preference settings
- Added ability to enable and specify format name for Custom Imports/Export through the "userlist.xml" file (previously this needed to be done in each user's preferences file)
- Added ability to specify linked directories through the "userlist.xml" file for each user
 - Class Rosters, Test Banks, and Remove Device lists placed in a linked directory will automatically appear on the user's Session Setup screen the next time they login, and will be automatically removed when they are removed from the linked directory.
